

Dear Partner,

Escola Politécnica is organizing the São Paulo School of Advanced Sciences on Nonlinear Dynamics (SPSASND). The event will take place at Escola Politécnica, University of São Paulo, from July 29th to August 9th, 2019.

There are up to 60 vacancies for Brazilian and up to 60 for foreigner candidates. They should be graduate students undergoing research in the field of nonlinear dynamics. Post-docs and undergraduate students may be considered, provided they are enrolled in related research programmes. For application requirements, please consult the website www.usp.br/spnl/. Questions must be sent by the e-mail to asnld@usp.br

All lecturers confirmed their participation (in alphabetical order): Alexei Mailybaev, Alois Steindl, Andrei Metrikine, Carlos Mazzilli, Celso Pesce, José Roberto Piqueira, Livia Cveticanin, Luis Antonio Aguirre, Marcelo Savi, Paulo Gonçalves, Roberto Camassa and Stefano Lenci.

A first wave of interested participants with more than 110 target graduate students (MSc and PhD) has already submitted their applications.

It is expected that the lecturers will help in advertising the School in all forums (institutions, congresses, journals etc.) to prospective students, having in mind that the selected ones from outside the State of São Paulo, both from Brazil and abroad, will be fully sponsored by FAPESP, regarding trip and accommodation expenses. Hence, we would like to ask you to take every opportunity to publicize the School. A world-wide audience and a well-spread institutional participation are pursued, as much as possible. An updated version of the School's flyer is attached to this message for this purpose.

It is also expected that the lecturers will supply until July, 1st their lecture notes (in power-point format) for distribution among the students. Templates for both the lecture notes and for the post-School Book to be published are already available from the website www.usp.br/spnl/ .

With best wishes,

José Roberto Castilho Piqueira

Carlos Eduardo Nigro Mazzilli

Celso Pupo Pesce

Guilherme Rosa Franzini
